Agile Backlog Creation & Sprint Simulation in Jira

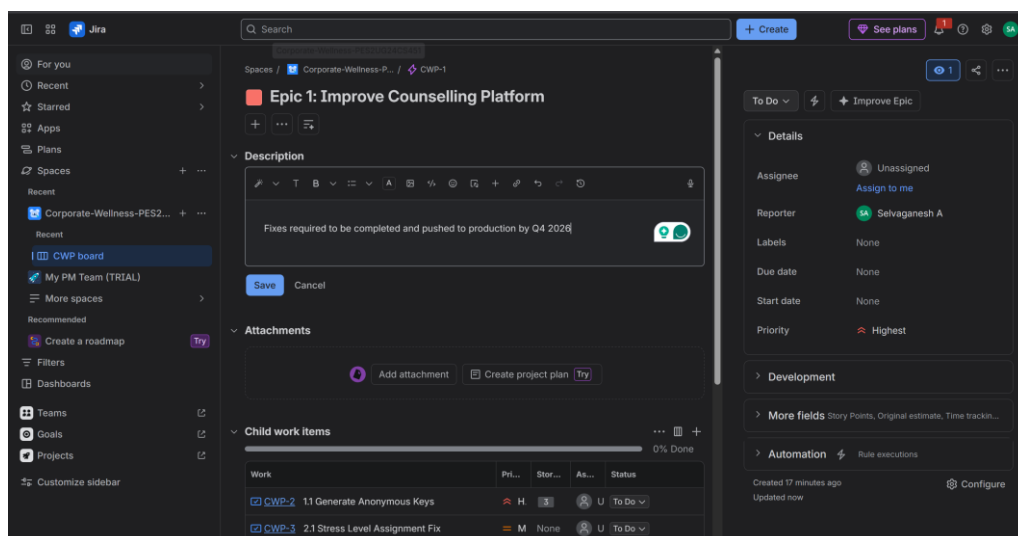

Selvaganesh Arunmozhi | 5 H

A Walkthrough

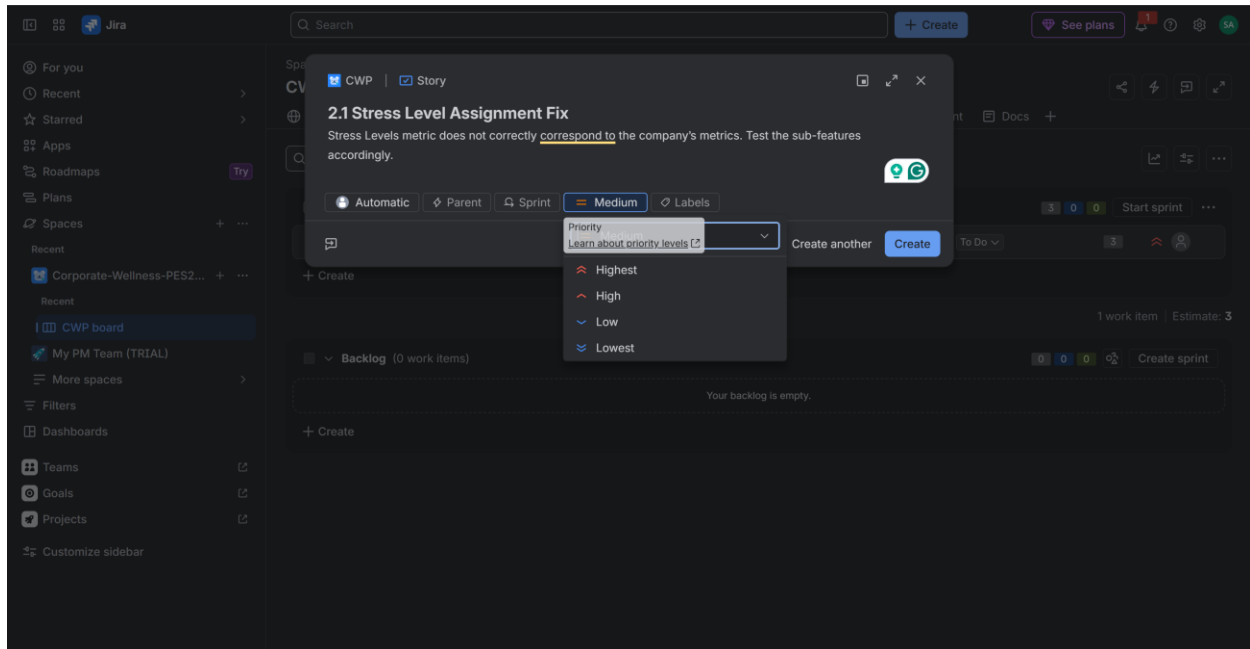

I have created a Scrum Board on Jira, and this is how the dashboard pretty much looks like (I had created an Epic and one Story before this)

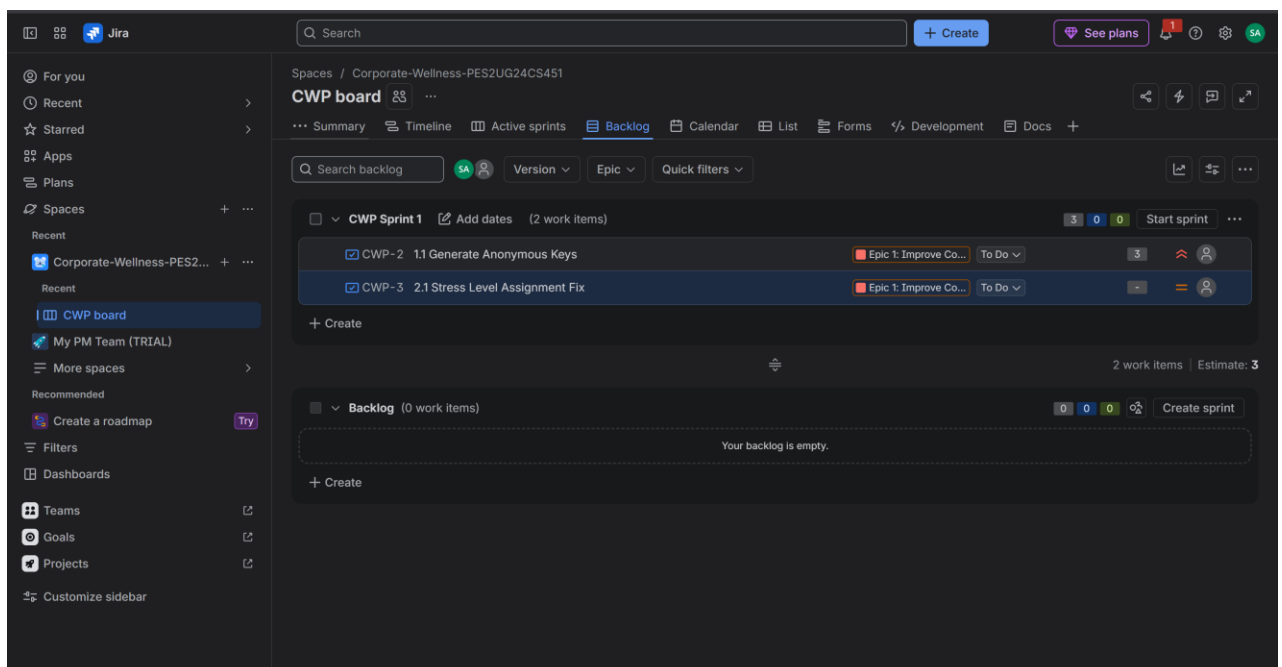

This is how an epic is created.

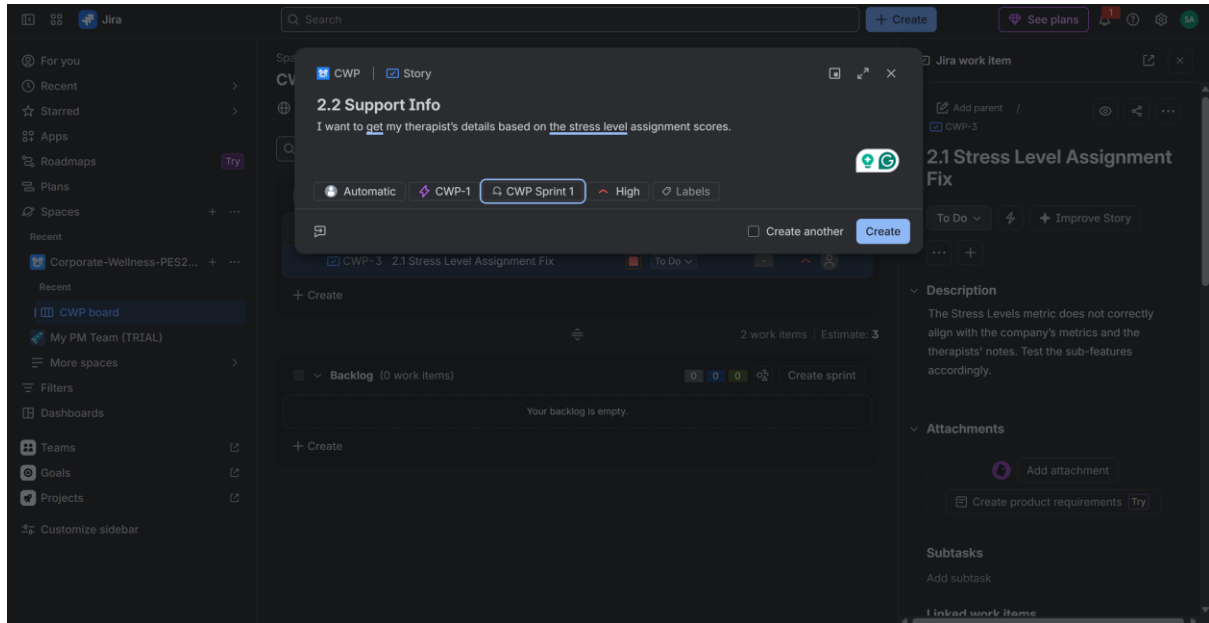

Here's how a story is created, along with a certain priority. I have categorized this under the epic that I had created before as the Parent.

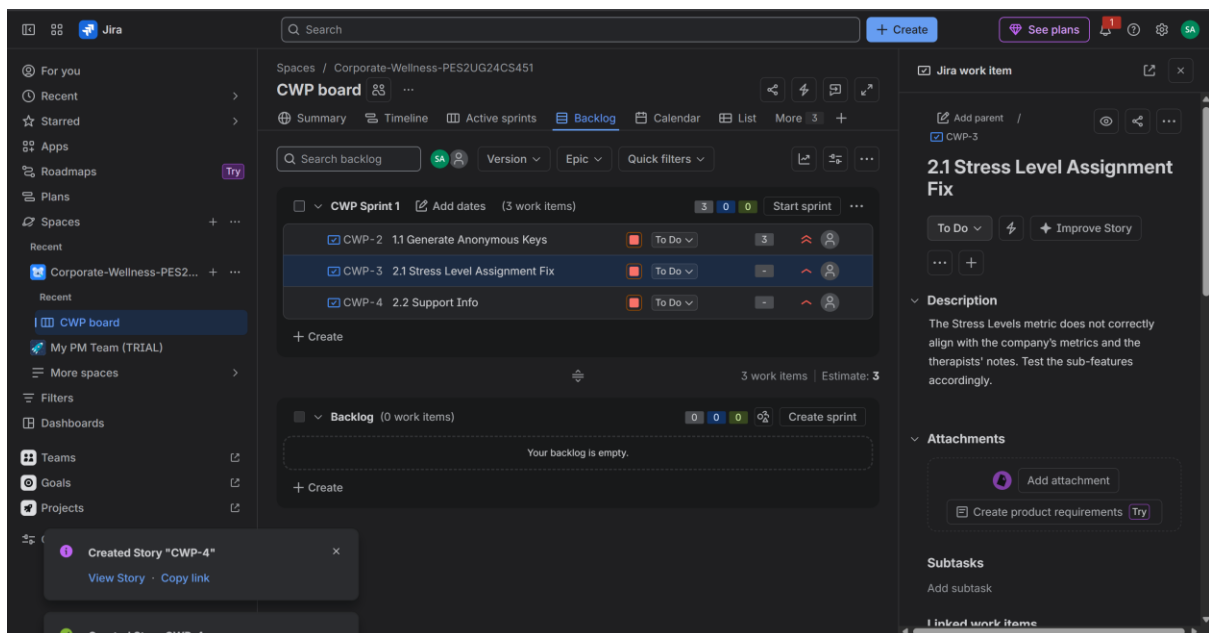

I had dragged the stories in the Backlog into the Sprint.

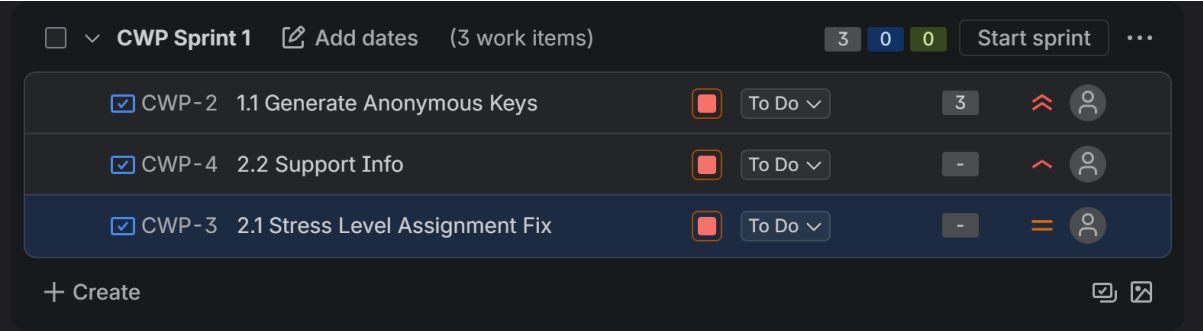

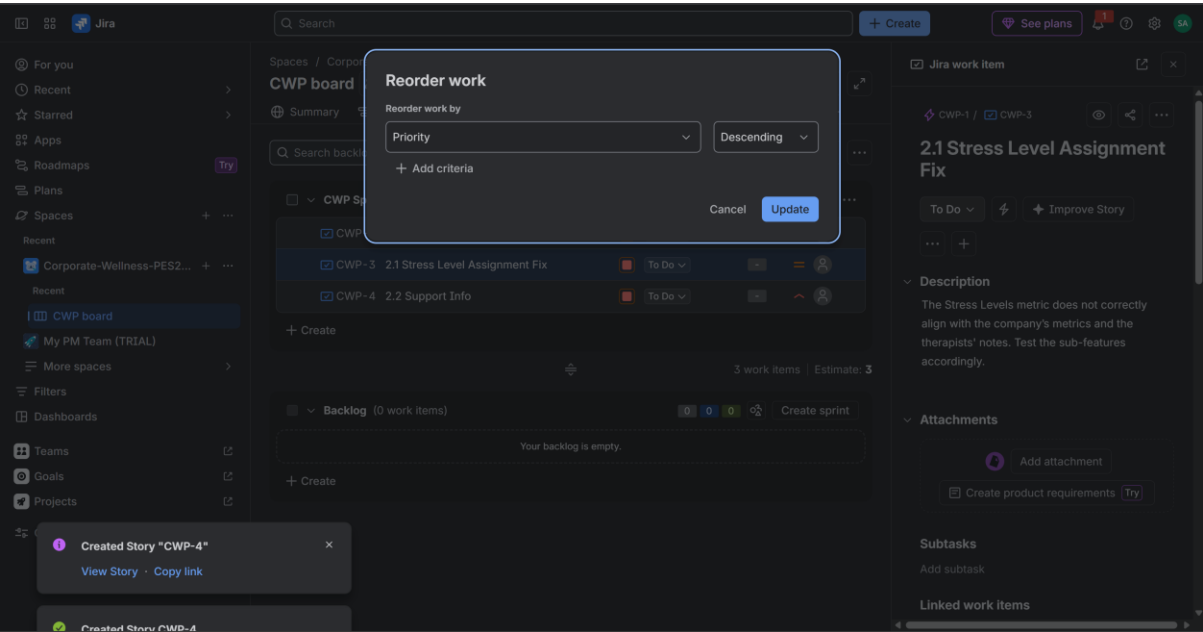

Here's another story and...

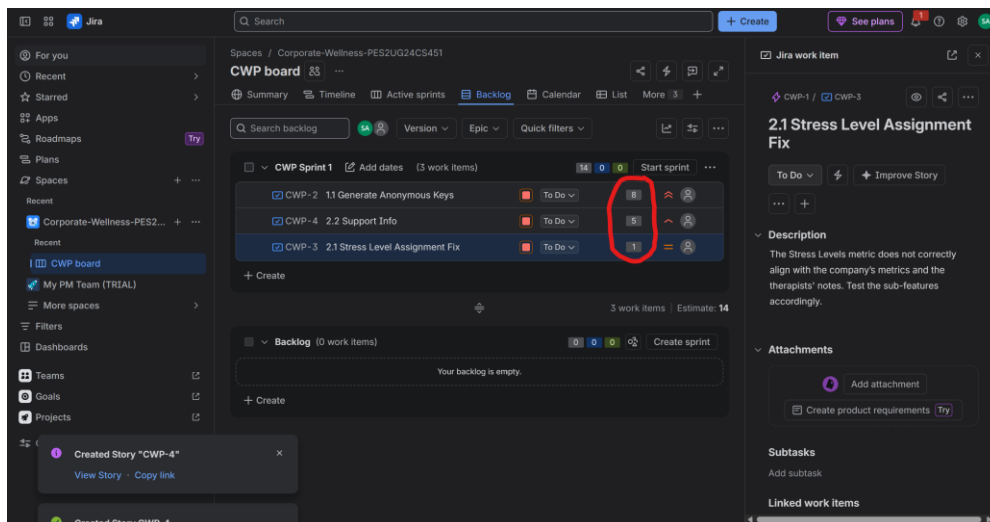

Voila, they go into the To-Do for the sprint!

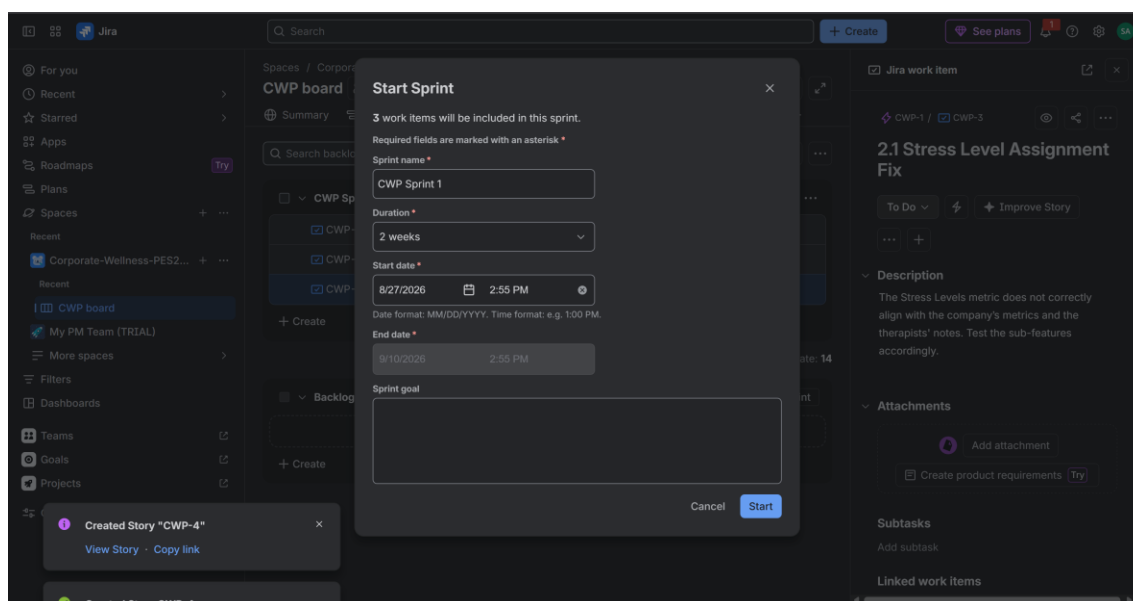

Reordered the tasks based on the descending priorities.

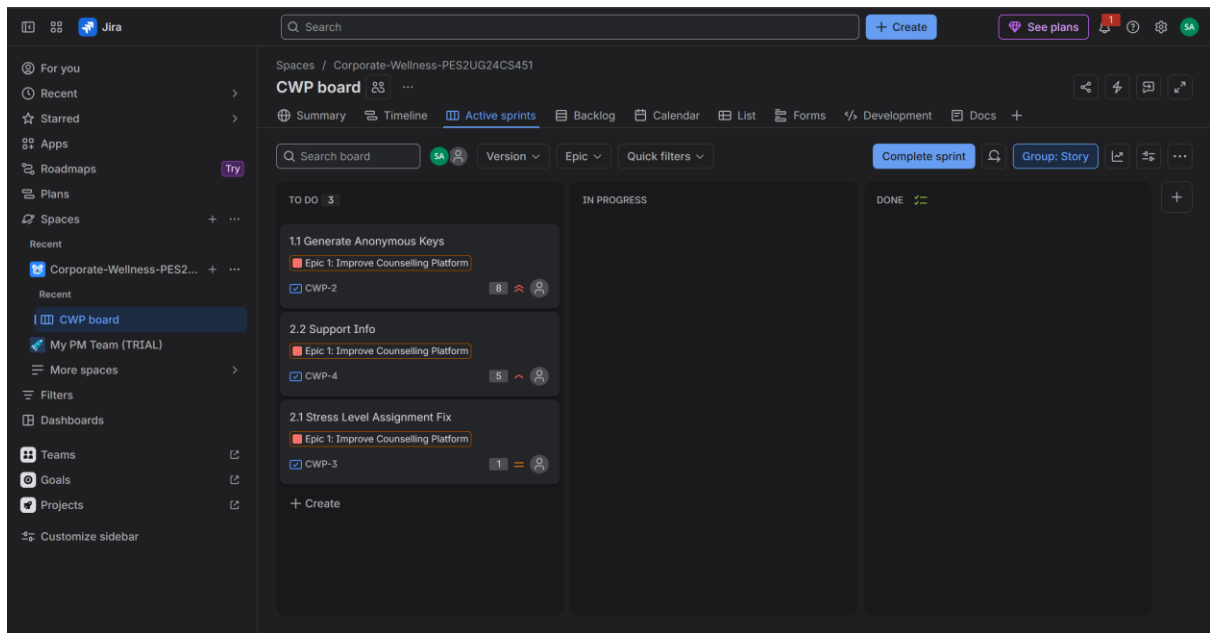

Added Story Points based on the Fibonacci Series

Starting Sprint...

All user stories populated in the Active Sprint's To-Do section

Sprint in Progress...
